colocación sistema de nivelación

1 Tras extender el cemento cola, colocaremos la baldosa a nivel y la asentaremos con el mazo. Después colocaremos las bases de nivelación en los lados de las baldosas.

2 Al colocar las baldosas adyacentes, introduciremos las cuñas en las bases.

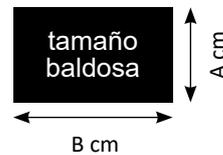

3 Primero ajustaremos la tenaza al espesor de la cerámica a trabajar. Después la apoyaremos como en el dibujo y apretaremos hasta nivelar las baldosas.

4 Dejar secar la superficie. Romper la base con la maza o con el pie, en el sentido de la junta y con la cuña puesta. Recupera las cuñas utilizadas.

NOTA: Nunca instalar el sistema de nivelación en las esquinas de las baldosas.
